STAUFF products and services are globally available through wholly-owned subsidiaries and a tight network of authorised distributors and representatives in all major industrial regions of the world.

**You can find detailed contact information on the last two pages of this product catalogue or at [www.stauff.com](http://www.stauff.com).**

Please note: Unless otherwise stated, all data and figures in this product catalogue are approximate values and are only valid as references, which are not binding (also in respect to any third parties' rights of protection) and thus do not release the customer / user from checking and testing the suitability of the products for the foreseen purposes. Therefore, data and figures can only be used in a limited sense for construction purposes.

The application of the products is beyond the control possibilities of the manufacturer and, therefore, is exclusively subject to the responsibility of the customer / user.

In the event that a liability is nevertheless considered, any compensation will be limited to the value of the goods supplied by the manufacturer and used by the customer / user. As a matter of course, the manufacturer guarantees the perfect quality of all products in accordance with the General Terms and Conditions of Business and Sale.

Subject to modifications due to the ongoing development and improvement of the products.

With the publication of this product catalogue, previous editions are no longer valid.

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 50000 standard products as well as numerous special and system solutions according to customer's specifications or based on our in-house development.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

## STAUFF LINE Components

With the seven dedicated **STAUFF Line** product groups

- **STAUFF Clamps**
- **STAUFF Connect**
- **STAUFF Flanges**
- **STAUFF Hose Connectors**
- **STAUFF Quick Release Couplings**
- **STAUFF Valves**
- **STAUFF Test**

from own, in-house development and manufacturing, the companies of the STAUFF Group provide a comprehensive range of components for fastening and connecting pipes, tubes and hoses for mobile and industrial hydraulic applications and many other industries.

The portfolio is completed by components for shutting-off, regulating, throttling and measuring fluid media.

In order to perfectly match each other, STAUFF Line products are designed and offered on a high, uniform level of quality. A large proportion of the range made from steel comes as standard with the premium STAUFF Zinc/Nickel surface coating, which is also optionally available for many of the other components.

This coating offers the most reliable surface protection far beyond the previous market standards – even after transport, handling and assembly of the components – and meets all current legal requirements.

If desired, Original Equipment Manufacturers can be supported with value-added services, from **technical consultation to pre-assembly, assembly and kitting** as well as **logistics services**:

- Support with the **selection of suitable standard components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from prototyping to large scale production
- **Analysis and optimization** of existing and design and developments of new systems aimed at increasing the efficiency and performance of machines and equipment and creating value for customers by reducing the total cost
- **Pre-assembly, assembly and kitting** of individual components to customer-specific system modules
- Individually coordinated **procurement solutions** (e.g. web shop and electronic data interchange) and **supply models** (e.g. from warehousing of customised components to Kanban logistics and just-in-time delivery of pre-fabricated system modules to the assembly lines of the customers) aimed at optimising material flows

Aligned with the needs of the market, the product groups

- **STAUFF Test**
- **STAUFF Diagtronics**
- **STAUFF Filtration Technology**
- **STAUFF Hydraulic Accessories**

include a comprehensive range of analogue and digital measuring equipment and devices, filtration systems and replacement filter elements as well as accessories for the construction of tanks, reservoirs, power packs and gear boxes in mobile and industrial hydraulics.

The offer is completed by relevant value-added services:

- Support with the **selection of suitable components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from prototyping to large scale production
- Analysis of existing hydraulic circuits aimed at filtration systems, tank components and monitoring devices that perfectly match to the specific requirements, and developing integrated concepts to increase the efficiency and performance of machines and equipment
- Individually coordinated **procurement solutions** and **supply models**

## STAUFF Quick Release Couplings

STAUFF couplings have proven their value for many years in practical use in hydraulic systems. The excellent quality of the couplings is the result of continual product improvement in which the experiences of users have been taken into consideration, as well. Our high production standards, combined with our quality management system certified in accordance with EN ISO 9001, assures the quality of our products.

For the technical specifications of the individual couplings please refer to the following pages of the catalog.

### Housing material

Steel according to EN 10277:  
Couplings Series FF, FU, HP-10, IA, IB, ID, BP, HUS, PS, RK/RH, FT, HH, HI, HT and MK with Zinc-Nickel coating,

Zinc-Plating and Thick-Film-Passivation  
(Chrome III)

### Seals

NBR (Buna-N®), PTFE  
ISO 3601

### Operating temperature

-25 °C ... +100 °C / -13° F ... +212° F  
with NBR (Buna-N®), PTFE  
-25 °C ... +200 °C / -13° F ... +392° F  
with FKM (Viton®)

Please contact STAUFF to require other combinations of materials.

The operating pressures specified in our catalog relate to the strength of the housing components. Standardized connector shapes may have other rated pressures, which cannot automatically be applied to the particular coupling type.

Any remodeling and modification of the couplings are prohibited. By any maintenance of our couplings it's necessary to use original STAUFF parts. In case of using of no original parts or disassembling of the couplings the warranty will be expire.

The STAUFF hydraulic couplings don't have the 94/7/EG guidance for the using in explosive field. The couplings don't have an own ignition source which could be a reason of inflame.

- Free of hexavalent chrome Cr(VI)
- ELV compliant according to 2000/53/EC (End of Life Vehicles Directive)
- REACH compliant according to 1907/2006/EC (Registration, Evaluation, Authorisation and Restriction of Chemicals)
- RoHS compliant according to 2002/95/EC (Restrictions of the Use of Hazardous Substances)

**Normative references**

- EN ISO 8330:2000, ISO 5675, ISO 5676, ISO 7241, ISO 16028, AMD 1

## [www.stauff.com/catalogues](http://www.stauff.com/catalogues)

The STAUFF online catalogue centre at [www.stauff.com/catalogues](http://www.stauff.com/catalogues) provides fast and direct access to digital versions of this as well as other STAUFF product catalogues in all available languages.

### Online Page-Flip Catalogues

- Easy navigation through index or the powerful full text search functionality
- Contents can be shared and forwarded by e-mail, printed or downloaded and saved in PDF file format
- Also suitable for mobile devices

### Download Catalogues

- Download entire product catalogues and save them in PDF file format

### Catalogue Request

- Contact form to request printed copies of the product catalogue as well as digital copies on USB stick

The fastest way to the online page-flip catalogue:

The links that can be found at the bottom edge of all pages of this product catalogue will lead you directly to the corresponding page in the online page-flip catalogue.

In doing so, contents can be searched, shared and forwarded by e-mail, printed or downloaded and saved in PDF file format.

Scan the QR code next to the direct link with the camera of your mobile device\* and also use the functions in this way.

\* may require a suitable app

**www.stauff.com**

With the STAUFF Digital Platform available at [www.stauff.com](http://www.stauff.com), commercial customers and users of STAUFF products can not only inform themselves in all detail about the 50000 components typically available from stock, but also directly purchase these online without complex registration.

General information about the companies of STAUFF Group, latest business and product news as well as complete global contact details also be available.

**www.stauff.com/cad**

Immediate access to and free download of 3D models and 2D drawings for a growing number of STAUFF products

**www.filterinterchange.com**

Online database for the quick and easy identification and interchange of almost all common brands and types of replacement filter elements

**Main Functionalities of the STAUFF Digital Platform:**

-  **Around the clock**  
Check stock availability and pricing for STAUFF products in real time
-  **Cross references**  
Search by article designations of other manufacturers / suppliers
-  **Live chat**  
Get directly in touch with the STAUFF customer service and sales team
-  **CAD database**  
Download 3D models and 2D drawings for STAUFF products

**Advantages as a Registered User of the STAUFF Digital Platform:**

-  **Purchase STAUFF products**  
Taking customer-specific pricing and delivery conditions into account
-  **Ordering w/o searching**  
Quick ordering by entering article number, quantity and requested delivery date
-  **File upload**  
Direct upload of orders with multiple positions in CSV or Excel file format
-  **Notepad function**  
Create project lists to save interesting products for later

## Screw-to-Connect Couplings • Overview

Description	Characteristics	Series	BG	DN Zoll Inch	DN metric ISO 4397
Screw-to-Connect Coupling	Acc. to ISO 14541 (BG 1-6)	HS-06 ("...-HX")	1	1/4"	6,3
		HS-10	2	3/8"	10
		HS-12	3	1/2"	12,5
		HS-19	4	3/4"	19
		HS-25	6	1"	25
		HS-25-...-HX	6	1"	25
Screw-to-Connect Coupling	Acc. to ISO 14541 (BG 1-6) Stainless Steel	HS-38	8	1 1/2"	38
		HS-06	1	1/4"	6,3
		HS-10	2	3/8"	10
		HS-12	3	1/2"	12,5
		HS-19	4	3/4"	19 (20)
		HS-25	6	1"	25
Screw-to-Connect Coupling	For Hammer Application	PS-25	08	1 1/4"	25
Flat Face Coupling	Pipeline Coupling	RH-10	2	3/8"	10
		RH-12	3	1/2"	12,5
		RH-16	4	5/8"	16
		RH-19	6	3/4"	19
		RH-25	8	1"	25
Flat Face Coupling	Male Tip Connect Under Pressure	FT-10	2	3/8"	10
		FT-12	3	1/2"	12,5
		FT-16	4A	5/8"	16
		FT-19	4	3/4"	19
		FT-25	5	1"	25
		FT-31	6	1 1/4"	31,5
Screw-to-Connect Coupling		HR-10	2	3/8"	10
		HR-12	3	1/2"	12,5
		HR-19	4	3/4"	19 (20)
		HR-25	6	1"	25
		HR-31	8	1 1/4"	31,5
		HR-38	10	1 1/2"	38
Screw-to-Connect Coupling		HH-10	2	3/8"	10
		HH-12	3	1/2"	12,5
		HH-19	4	3/4"	19 (20)
		HH-25	6	1"	25
		HH-31	8	1 1/4"	31,5
		HH-38	10	1 1/2"	38
		HH-51	12	2"	51
Screw-to-Connect Coupling	Stainless Steel	HH-10	2	3/8"	10
		HH-12	3	1/2"	12,5
		HH-19	4	3/4"	19 (20)
		HH-25	6	1"	25
		HH-31	8	1 1/4"	31,5
		HH-38	10	1 1/2"	38
		HH-51	12	2"	51
Screw-to-Connect Coupling	Acc. to ISO 14540	HI-06	1	1/4"	6,3
		HI-10	2	3/8"	10
		HIB-06	1	1/4"	6,3
		HIB-10	2	3/8"	10
		HT-19	4	3/4"	19 (20)
Screw-to-Connect Coupling	Wing Style	HT-25	6	1"	25
		HM-19	4	3/4"	19 (20)
Screw-to-Connect Coupling	Wing Style Brass and Carbon Steel	HM-25	6	1"	25
		HM-31	8	1 1/4"	31,5
		HM-38	10	1 1/2"	38
Screw-to-Connect Coupling	Wing Style	HV-19	4	3/4"	19 (20)
		HV-25	6	1"	25
		HV-31	8	1 1/4"	31,5
		HV-38	10	1 1/2"	38
		HV-51	12	2"	51

CC	Complete Coupling	BF	Dust Cover Body with flip-lid	Gxx	BSP Female thread ISO 1179	F6xx	Flange head 420 bar (6000 PSI), ISO 6262-2
F	Female Body with Valve	HM	Male Tip holder (parking station for Male Tip)	Bxx	BSP Male thread ISO 1179	F3xx	Flange head 350 bar (3000 PSI), ISO 6162-1
FD	Female Body with Dust Plug / Cap	BH	Breakaway holder	NFxx	NPTF Female thread ANSI B 1.20.3	UxxM	UNF Male ORB thread SAE J1926-1, ISO 11926
FF	Female Body with fixed Dust Cover flap lid	FSK	Female Body Sealing Kit	Uxx	UNF Female thread SAE J1926-1, ISO 11926	Cxx	Counter Flange Plate 420 bar (6000 PSI), ISO 6162-2
M	Male Tip with Valve	MSK	Male Tip Sealing Kit	MxxM	Metric Male thread ISO 6149	F6xxM/U/H	
MW	Male Tip without Valve	FP	Fixed part	Mxx	Metric Female thread ISO 6149		Flange 420 bar (6000 PSI), with metric thread / UNC tread / Through hole
MD	Male Tip with Dust Cap / Plug	MP	Mobile part	xxL	Metric Male thread with 24° cone Light series, ISO 8434-1		
DF	Dust Cap/ Plug for Female Body	LV	Lock Valve	xxN	Metric Male thread with 24° cone Light series, ISO 8434-1, Bulkhead	C6xxM/U/H	
DM	Dust Cap/ Plug for Male Tip	SP	Spare parts	xxS	Metric Male thread with 24° cone Heavy series, ISO 8434-1		Counter Flange 420 bar (6000 PSI), with metric thread / UNC tread / Through hole
SF	Slip-on flap lid	FW	Female Body without Valve	xxT	Metric Male thread with 24° cone Heavy series, ISO 8434-1, Bulkhead		

⑥ Sealing Material	
B	NBR (Buna-N®)
PT	PTFE (Teflon)
V	FKM (Viton®)
E	EPDM (Ethylen-Propylen Dien-Kautschuk)
PU	Polyurethan
BT	NBR (Buna-N®) + PTFE (Teflon)
VT	FKM (Viton®) + PTFE (Teflon)
BP	NBR (Buna-N®) + PU (Polyurethan)
BV	NBR (Buna-N®) + FKM (Viton®)
VP	FKM (Viton®) + PU (Polyurethan)
S1	NBR (Buna-N®) + PU (Polyurethan) + PTFE (Teflon)
S2	NBR (Buna-N®) + PU (Polyurethan) + PTFE (Teflon) + FKM (Viton®)
HB	High emperature NBR
HV	High temperature NBR + FKM (Viton®)
S3	High temperature NBR + FKM (Viton®) + PTFE (Teflon)
S4	NBR (Buna-N®) + FKM (Viton®) + PTFE (Teflon)

⑦ Surface / Material	
W3	Steel, zinc-nickel plated
W4	Stainless Steel V2A
W5	Stainless Steel V4A
W48	Steel, zinc plated (with Chrome VI, A3C)
W66	Steel chromium VI-free zinc plated plus thick-layer-passivation (contents CrIII)
W69	Brass
W89	Aluminium exloxtated
W126	Aluminium exloxtated and Stainless Steel V2A
W138	Steel, zinc-nickel plated and zinc (with Chrome VI) plated
W139	Brass and Plastic
W162	Brass and Steel chromium VI-free zinc plated plus thick-layer-passivation (contents CrIII)
K	Plastic

**FF/FU**  
**FH**

Series FF/ FH/ FU • Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel, Zinc-Plating and Thick-Film-Passivation (Chrome III) only FF/FU 51
Standard Seal Material(s)	NBR (Buna-N®), PTFE, PU <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Flat Face
Connection	Push
Disconnection	Actuate Push Sleeve
Connect Under Pressure	not allowed, (Male Tip Series FU up to the max. Working Pressure allowed)
Application	Construction Machinery, Industrial Hydraulic
ISO Interchange	ISO 16028

<sup>2</sup>Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

Flow Characteristics

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch).

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

	1.18	1.79	4.49	.63	.85	1.81		182.10
 G 1"	30	45,5	114	18	21,5	46	QRC-FU-19-M-G16-BT-W3	77,90
	1.18	1.79	4.49	.71	.85	1.81		171.74

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

HP/HU

### Series HP ▪ Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel <sup>1</sup> , Zinc-Plating and Thick-Film-Passivation (Chrome III)
Standard Seal Material(s)	NBR (Buna-N®), PTFE <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Poppet Valve
Connection	Push (When mounting the Sleeve in Bulkhead), Push and actuate Push-Pull Sleeve
Disconnection	Pull (When mounting the Sleeve in Bulkhead), Actuate Push-Pull Sleeve
Connect Under Pressure	not allowed, (Male Tip Series HU up to the max. Working Pressure allowed)
Application	Agricultural and Forestry Machinery
ISO Interchange	ISO 7241-1 A and ISO 5675 (for selected sizes).

HP/HU

<sup>1</sup> Only Nominal Size 12,5  
<sup>2</sup> Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

### Flow Characteristics

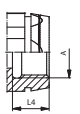

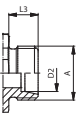

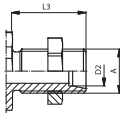

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch).

UX

### Series UX ▪ Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Plating and Thick-Film-Passivation (Chrome III)
Standard Seal Material(s)	NBR (Buna-N®), PTFE <sup>2</sup>
Working Temperature	-30° C ... +100° C / -22° F ... +212° F
Valve Design	Poppet Valve
Connection	Push
Disconnection	Pull
Connect Under Pressure	Female Body up to max. 2,5 bar / 36 PSI, ISO-A Male Tip up to the max. Working Pressure allowed
Application	Agricultural and Forestry Machinery
ISO Interchange	ISO 7241-1 Series A, Size 12,5

The series UX coupling sleeve is available in two different overall lengths and is therefore compatible with the common commercially available built-in couplings.

<sup>2</sup> Alternative seal materials are available on request.

### Technical Data

UX

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

IA

### Series IA - Stainless Steel

Material	Stainless Steel V4A (AISI 316)
Surface Finishing	-
Standard Seal Material(s)	FKM (Viton®) <sup>2</sup>
Working Temperature	-25° C ... +200° C / -13° F ... +392° F
Valve Design	Poppet Valve
Connection	Push and actuate Push Sleeve
Disconnection	Actuate Push Sleeve
Connect Under Pressure	not allowed
Application	Agricultural and Forestry Machinery, Industrial Hydraulic
ISO Interchange	ISO 7241-1, Series A

<sup>2</sup> Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

### Flow Characteristics

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series IA-12.

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

Series IB - Carbon Steel

Series IB - Overview	70	Series IB-38 - BG 8 - Nominal Size 38	73
Series IB-03 - BG 0 - Nominal Size 3,2	71	Series IB-51 - BG 9 - Nominal Size 51	73
Series IB-06 - BG 1 - Nominal Size 6,3	71	Series IB - Dust Protection	74
Series IB-10 - BG 2 - Nominal Size 10	71		
Series IB-12 - BG 3 - Nominal Size 12,5	72		
Series IB-19 - BG 4 - Nominal Size 19	72		
Series IB-25 - BG 6 - Nominal Size 25	72		

Series IB • Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel
Standard Seal Material(s)	NBR (Buna-N®) <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Poppet Valve
Connection	Push and actuate Push Sleeve
Disconnection	Actuate Push Sleeve
Connect Under Pressure	not allowed
Application	Industrial Hydraulic
ISO Interchange	ISO 7241-1, Series B

<sup>2</sup>Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

Flow Characteristics

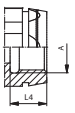

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

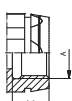

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series IB-12.  
\* Insertion Male Tip.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

### Flow Characteristics

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series IB-12.  
\* Insertion Male Tip.

	G 3/4"	51,8	31,45	91,5	57	16	34	34	34	QRC-IB-19-F-G12-VT-W5	56 123.46	QRC-IB-19-M-G12-V-W5	21 46.30
	NPTF 3/4" -14	51,8	31,45	91,5	57		34	34	34	QRC-IB-19-F-NF12-VT-W5	56,50 124.56	QRC-IB-19-M-NF12-V-W5	21,50 47.40

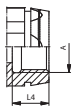

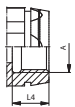

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

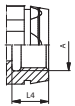

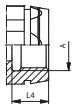

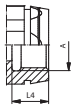

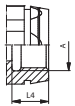

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series IB-12.  
\* Insertion Male Tip.

ID

### Series ID • Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel
Standard Seal Material(s)	NBR (Buna-N®) <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Poppet Valve
Connection	Push and actuate Push Sleeve
Disconnection	Actuate Push Sleeve
Connect Under Pressure	not allowed
Application	Industrial Hydraulic
ISO Interchange	-

<sup>2</sup>Alternative seal materials are available on request.

Series BP • Overview	92
Series BP-12 • BG 3 • Nominal Size 12,5	93
Series BP • Dust Protection	93

BP

### Series BP ▪ Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel
Standard Seal Material(s)	NBR (Buna-N®), PTFE <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Flat Face
Connection	Push and actuate Push Sleeve
Disconnection	Actuate Push Sleeve
Connect Under Pressure	not allowed
Application	Agricultural and Forestry Machinery
ISO Interchange	ISO 5676

<sup>2</sup>Alternative seal materials are available on request.

### Technical Data

MK

## Series MK

### Description

The multi-coupling has been created for connecting and disconnecting several hydraulic lines at the same time. This is done by an operating lever the guide crank of which is designed for a minimum of operating force.

The connection of the hydraulic lines is done with flat face couplings. Due to the special sealing it is possible to couple against trapped pressure on the male halves (max. 4x100 bar / 4x1450 PSI)

The main features of the multi coupling are:

- Safety against commutability of hydraulic lines
- Quick connecting
- Coupling against trapped pressure
- Optimally minimized spillage during coupling process

### Spare Parts

The following list shows the spare parts available for the line of the multi-coupling products. They are supplied in form of kits, including detailed removal and installation instructions:

Description	MK 24	MK 74
	Ordering Codes	Ordering Codes
Operating lever kit	QRC-MK-Q-10/4-SP-OL-W3	QRC-MK-R-10/4-SP-OL-W3
Safety lock kit	QRC-MK-Q-10/4-SP-SL-W3	QRC-MK-Q-10/4-SP-SL-W3
Dust protection kit	QRC-MK-Q-10/4-SP-DP-K	QRC-MK-R-10/4-SP-DP-K
Female coupling	QRC-EK-10-F-XXX-BT-W3	QRC-EK-10-F-XXX-BT-W3

MK

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

Series HS - Carbon Steel

Series HS - Overview	114	Series HS-38 - BG 8 - Nominal Size 38	122
Series HS-06 - BG 1 - Nominal Size 6,3	115	Series HS - Dust Protection	123
Series HS-10 - BG 2 - Nominal Size 10	116		
Series HS-12 - BG 3 - Nominal Size 12,5	117-118		
Series HS-19 - BG 4 - Nominal Size 19	119		
Series HS-25 - BG 6 - Nominal Size 25	120		

HS

Series HS ▪ Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Plating and Thick-Film-Passivation (Chrome III)
Standard Seal Material(s)	NBR (Buna-N®) <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Poppet Valve
Connection	Screw
Disconnection	Screw
Connect Under Pressure	Male Tip/Female Body up to 33% of the Working Pressure with Tools
Application	Construction Machinery
ISO Interchange	ISO 14541 (BG 1-6)

<sup>2</sup>Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

Flow Characteristics

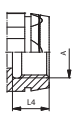

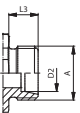

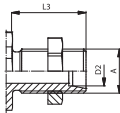

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch).

Available on request with a safety clamp and Hexagonal Sleeve.

**HS**

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

SW: Width across flats. All dimensions in mm (inch).

### Series HS ▪ Stainless Steel

Material	Stainless Steel V4A (AISI 316)
Surface Finishing	-
Standard Seal Material(s)	FKM (Viton®) <sup>2</sup>
Working Temperature	-25° C ... +200° C / -13° F ... +392° F
Valve Design	Poppet Valve
Connection	Screw
Disconnection	Screw
Connect Under Pressure	Male Tip/Female Body up to 33% of the Working Pressure with Tools
Application	Agricultural and Forestry Machinery, Construction Machinery, Industrial Hydraulic
ISO Interchange	ISO 14541 (BG 1-6)

<sup>2</sup>Alternative seal materials are available on request.

### Series PS ▪ Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel
Standard Seal Material(s)	HNBR, FKM (Viton®), PTFE <sup>2</sup>
Working Temperature	-20° C ... +150° C / -4° F ... +302° F
Valve Design	Poppet Valve
Connection	Screw
Disconnection	Screw
Connect Under Pressure	not allowed
Application	Construction Machinery
ISO Interchange	-

<sup>2</sup>Alternative seal materials are available on request.

### Technical Data

Series	BG	DN Zoll	DN metric ISO 4397	Q <sub>max</sub>		Working Pressure		Bursting Pressure Connected		Female Body		Male Tip		Spillage

In addition to the standard colours as stated above, plastic dust caps are also available in blue, green, yellow and black. Please use the color codes BU, GN, YE and BK respectively instead of RD.

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

FT

### Series FT • Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel
Standard Seal Material(s)	NBR (Buna-N®), PTFE <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Flat Face
Connection	Screw
Disconnection	Screw
Connect Under Pressure	Male Tip up to the max. Working Pressure allowed
Application	Construction Machinery, Industrial Hydraulic
ISO Interchange	-

<sup>2</sup>Alternative seal materials are available on request.

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

HH

### Series HH ▪ Carbon Steel

Material	Carbon Steel
Surface Finishing	Zinc-Nickel
Standard Seal Material(s)	NBR (Buna-N®) <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Poppet Valve
Connection	Screw
Disconnection	Screw
Connect Under Pressure	Male Tip or Female Body allowed
Application	Industrial Hydraulic, Rescue and Tensioning Hydraulics
ISO Interchange	-

<sup>2</sup>Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

### Flow Characteristics

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series HH-12.  
\* Insertion Male Tip.

### Series HH ▪ Stainless Steel

Material	Stainless Steel V4A (AISI 316)
Surface Finishing	-
Standard Seal Material(s)	FKM (Viton®) <sup>2</sup>
Working Temperature	-25° C ... +200° C / -13° F ... +392° F
Valve Design	Poppet Valve
Connection	Screw
Disconnection	Screw
Connect Under Pressure	Male Tip or Female Body allowed
Application	Industrial Hydraulic, Offshore, Rescue and Tensioning Hydraulics
ISO Interchange	-

<sup>2</sup>Alternative seal materials are available on request.

The indicated pressure ratings only apply to the coupling itself and depend on the connection type.

### Flow Characteristics

Please note: Unless otherwise stated, all flow characteristics have been determined with hydraulic oil with a kinematic viscosity of 28,8 - 35,2 mm<sup>2</sup>/s (28,8 - 35,2 cSt) and are only valid for components with non-reducing connections.

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series HH-12.

**HH**

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

SW: Width across flats. All dimensions in mm (inch). Drawing similar Series HH-12.

Dimensions (mm/in)			Material	Dust Cap for Male Tip
D1	D2	L		Ordering Codes
49,5	45	205	Carbon Steel with Steel cable	QRC-HT-19-DM-41/CN-W3
1.95	1.95	8.07		
59,5	54	205	Carbon Steel with Steel cable	QRC-HT-25-DM-49/CN-W3
2.34	2.13	8.07		

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

**Series HM - Carbon Steel and Brass**

Material	Brass and Carbon Steel
Surface Finishing	Carbon Steel: Zinc-Plating and Thick-Film-Passivation (Chrome III)
Standard Seal Material(s)	NBR (Buna-N®) <sup>2</sup>
Working Temperature	-25° C ... +100° C / -13° F ... +212° F
Valve Design	Flat Valve
Connection	Screw
Disconnection	Screw
Connect Under Pressure	not allowed
Application	Industrial Hydraulic
ISO Interchange	-

Male Tip

Female Body

HV

In addition of our common couplings series, we also have various special designs for a huge range of special applications, even outside the hydraulic area, in our portfolio.

We are open minded to find customized solutions for all kind of applications and different influencing factors and work them out for or together with our customers.

## Water Application

## Electro-technics

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

### Automotive Engineering

### Agricultural Engineering

### Refrigeration

Note: The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

Dust cover body	188
Marking Clips	189
Safety Clamp with 4-hole flange	189
Anchor bracket for Male Tip	189
Seal Kits	190 - 191

## Dust cover clips

### Description

This dust guard can be fitted to the Female Body after installation for the Series HP and FF. The cap is also available with an optional drill hole for a marking clip.

In addition to the standard colour black, plastic dust caps are also available for the types HP-10 and the series FF in blue, green, yellow and red. Please use the old color codes BL, GN, GE and RT respectively instead of SW. Please use the STAUFF codes BU, GN, YE and RD respectively instead of BK. The types HP-08 and HP-12 are only available in black.

Type	Without bore	With bore
	Ordering Codes	Ordering Codes

**Safety Clamp with 4-hole flange**
**Description**

This safety clamp enables the HP-10 Female Body to be rigidly secured on the vehicle. The carrier is held in the clamp by a spring.

**Ordering Codes**

QRC-SZ-BH-38-W66

**Anchor bracket for Male Tip**
**Description**

The anchor bracket allows the Male Tip to be parked when disconnected. This protects the probe from damage and dirt. The anchor bracket is made of red plastic and fitted with a spring-loaded cap.

Note: Any disconnection of the coupling leads up to the expiration of the guarantee.

## Safety Regulations for Handling of Quick Release Couplings and Accessories

### Important !

Incorrect selection or incorrect and inexpert handling of couplings and accessories may result in property damage or personal injury.

- High velocity fluid discharge
- Explosion or combustion of the conveyed fluid
- Collision with moving or dropping components, caused by failure of a hydraulic circuit
- Dangerous whipping of hydraulic hoses
- Risk of injury through contacting hot, cold or otherwise dangerous fluids

Read and observe the following instructions prior to selecting and using a snap-in coupling or associated accessories.

### 1 General Notes

#### 1.1 General

This section contains instructions on selection and handling (installation, coupling and uncoupling and maintenance). This is to be understood as additional safety notes and must be taken into consideration in the use and application of the products.

#### 1.2 Safety Measures

Couplings may possibly fail without prior warning. Take this into consideration when planning the safety devices of your system or plant.

#### 1.3 Information for the User

Forward these safety notes to the persons responsible for the selection and handling of couplings. Use only couplings for which you have received and understood product-specific information.

### 1.4 Responsibility of the User

Due to the versatile range of applications of couplings, not every application case and every technical detail can be dealt with in this document.

The user is responsible for:

- final selection of the product
- fulfilment of requirements by the operator
- safety of operating personnel and plant
- safety measures necessary in the use of couplings

Should you have any further questions, please contact our sales department.

### 2 Correct Selection of Couplings

#### 2.1 Pressure Range

The coupling to be used must be selected so that the maximum permissible operating pressure is equal to or higher than the system pressure. Pressure peaks in the system in excess of the operating pressure reduce the service life of the couplings and therefore should be taken into consideration when making the selection.

#### 2.2 Resistance to Media

The Sealing Materials in the couplings are suitable for a large variety of pressure media. Information on the compatibility of a particular type of fluid are available upon request from product manager.

#### 2.3 Operating Temperature

The indication of operating temperatures in the technical specifications represents maximum values. These values may not be exceeded in standing or flowing circuits. For actuation the natural warming of the coupling must also be taken into consideration.

### 2.4 Size

The selection of the size and type of connection depends on the required transmission of forces. For this purpose, refer to the corresponding diagrams. Flow volume, pressure loss and flow speed should be taken into consideration when selecting the correct size of a coupling. Should these values be exceeded, malfunctions within the coupling may occur.

### 2.5 Mechanical Connection

The connection of the two halves of a coupling is achieved depending on the type. It is important to observe the positive engagement of plug-type couplings and the secure tightening of screw-type couplings to the limit stop of the thread. Forced or improper separation will result in malfunction of the coupling.

### 2.6 Thermal Stress

Excessive warming of the coupling above the recommended operating temperature, for instance due to welding or soldering, can cause the formation of dangerous gases. In addition, the protective surface finish (galvanization) will be damaged and the function of the coupling may be impaired.

### 2.7 Guidelines

Applicable specifications, standards and regulations as well as technical rules must be taken into consideration in the selection of couplings.
